

A RAILROAD WRECK.

Caused by a Defective Bridge.

THE O'SHEA DIVORCE CASE

Results in a Verdict for the Petitioner.

Three Men Killed by a Boiler Explosion.

End of the O'Shea Divorce Case.

By Cable and Associated Press.]
LONDON, Nov. 17.—The trial of the O'Shea divorce case was resumed this morning. The first witness was a servant at O'Shea house at Eltham at the time O'Shea charges Parnell with paying clandestine visits to his wife. She testified that Mrs. O'Shea and Parnell were once locked in a drawing-room, and that Mrs. O'Shea afterwards explained that the locking of the door was essential to the safety of Parnell, as secret societies were prowling about the vicinity. She also told witness to deny that Parnell visited the house.

Another servant testified that Mrs. O'Shea and Parnell were locked in a room after midnight.

Mrs. O'Shea's former coachman testified to driving Parnell to Mrs. O'Shea's residence after midnight.

An ex-page testified that he lived in the service of Mrs. O'Shea at Eastbourne, and that Parnell lived in the same house.

Another witness testified that Mrs. O'Shea took the Eastbourne house and paid the rent, and that Parnell resided there, and also at a house in Regent Park, which Mrs. O'Shea also rented.

Mrs. Steele, sister of Mrs. O'Shea, whom the latter charged with adultery with Captain O'Shea, took the stand and denied the charge.

One of the jurors insisted that the petitioner be cross-examined on the counter-charges made by his wife, and he was recalled. He testified that he lived apart from his wife at her desire. He denied the charges of cruelty, and said he always treated his wife with kindness. He invited Parnell to his house after challenging him to fight a duel because he became convinced that his suspicious regarding his wife and Parnell were baseless.

In summing up to the jury, the Justice dwelt upon the charge of connivance made by Mrs. O'Shea, and asked why the necessity for all the disguises resorted to by Parnell if the petitioner connived at his wife's infidelity.

This closed the evidence, as neither respondent nor co-respondent made any defense, and the case was given to the jury, who returned a verdict that adultery had been committed by Mrs. O'Shea and Parnell, and that there had been no connivance on the part of Captain O'Shea. The court granted a divorce with costs, to the petitioner, and also awarded him the custody of the younger children.

Under a Social Cloud.

By Cable and Associated Press.]
LONDON, Nov. 17.—The Telegraph has published Parnell's political obituary. It says he must cease for the present at least to lead the Nationalist party.

It is reported the followers of Parnell do not desire him to retire unless by his own volition, in which event the leadership of the Irish party will be vested in a commission, of which Justin McCarthy will be President.

A Defective Railroad Bridge.

By Cable and Associated Press.]
KANSAS CITY, Nov. 17.—This morning a freight train of five cars on the Kansas City, Wyandotte & Northwestern, while crossing a bridge over the Kaw river, in this city, was precipitated into the river, a distance of thirty-one feet, by a span giving way. Ellis Moore (colored), who was stealing a ride, was killed, and Fireman Fred Allen is supposed to be under the wreck.

An Extensive Lockout.

By Associated Press.]
DANBURY (Conn.), Nov. 17.—Two thousand girls employed in the trimming departments of eighteen hat factories were locked out this morning. Some of the factories shut down, and the remainder continue to work in other departments. Over 5,000 hatters are idle.

Fatal Boiler Explosion.

By Associated Press.]
READING (Pa.), Nov. 17.—At Mertz-town this morning, one of the boilers exploded and the building was wrecked. Henry Epler, Sasseman Hilbert and Charles Oswald were instantly killed, and seven others badly wounded.

The Restless Sioux.

By Associated Press.]
MANDAN (N. D.), Nov. 17.—Superintendent Green at the Riverside ranch, whose range is near the Sioux reservation, came in this morning, and he says the Indians are coming north well armed and acting in an unfriendly manner. A number of the Indians are armed with two guns each and plenty of ammunition. They passed through town presumably to stir up the Indians of the reservations of the north.

The citizens are coming in from the south and are beginning to stir up the authorities at Washington. There are enough Indians traveling about this section to run off all the cattle all kill half the settlers in the country.

WASHINGTON, Nov. 17.—A telegram from General Miles was received this morning by General Schofield, saying there seems to be no danger of trouble with the Sioux Indians at the reservation at Rosebud and other agencies. They begin to distrust the promises of their medicine man about the coming of the Messiah.

Another Report.

MANDAN (N. D.), Nov. 17.—Friendly Indians bring warnings from the Sioux reservation. They say there is the greatest danger here; that the Indians propose to attack Fort Abraham Lincoln, knowing there are but fifty soldiers there. Then they will capture Mandan, massacre the citizens and burn the town. The greatest alarm prevails among the people. It is reported the Indian police at Standing Rock have torn off their badges and revolted.

To-day's Silver Purchase.

WASHINGTON, Nov. 17.—The amount of silver offered the Treasury Department to-day was 1,475,000 ounces; the amount purchased was 745,000 at \$1 to \$1.005, mostly the former.

The amount purchased during November at the mints, to date, is 425,375 ounces. The amount purchased to date, including that at the mints, is 3,977,375 ounces.

Peasantry Wounded by Troops.

By Cable and Associated Press.]
ST. PETERSBURG, Nov. 17.—A reported riot occurred last week fifteen miles from Moscow. The troops shot and wounded 100 peasants and workmen for refusing to receive commands from the newly-appointed district officials. The rioters bound the officials with cords and sent them to Moscow.

Barium Improving.

By Associated Press.]
BRIDGEPORT (Conn.), Nov. 17.—P. T. Barium was better this morning and was able to sit up, read the papers and attend to some business.

Bar silver, 100.

LOCAL INTELLIGENCE.

Painful Accident.

Yesterday as Louis Capurro and another Italian were returning from Verdi in a light wagon, their team became unmanageable near the Verdi bridge. Both men jumped to the ground and Capurro suffered a triple fracture of one of his legs, and the other man was considerably bruised, and suffered no bone fractures. J. P. Foulks came along soon after the accident and immediately drove to Verdi, where he secured a vehicle, in which both of the injured men were sent to Reno, and both of them are said to be doing well.

Modern Architecture.

Modern dwellings, and especially modern office buildings, are becoming a mass of mechanical, electrical, hydraulic and pneumatic contrivances. The putting up of a tall building requires almost as much careful engineering as in building a tower for the Brooklyn Bridge. Architects are continually calling upon civil engineers to solve the problems by which they are confronted in work of this kind. A distinct class of engineers who give special attention to this work is growing up in the large cities.

Wanted To Go Home.

This afternoon T. K. Hymers' cream carriage horse, which for several weeks has been driven by Francis G. Newlands and family, escaped from his driver on the South Side, and came tearing across the iron bridge at a lively gait. He came up Virginia street to Second, when he turned and took a straight shoot for Hymers' stable, where he was secured. No damage was done to the carriage, but the horse is said to have been somewhat injured.

How Space is Saved.

Figures show that the consumption of iron in general construction—other than railroads—in this country has grown from a little more than 1,500,000 tons in 1879 to more than 6,000,000 tons in 1889. Much of this increase has gone into iron buildings. By using huge iron frames and thin curtain walls for each story supported thereon, as is done in a building going up on Lower Broadway, New York, a good deal of space can be saved.

Liberal Bequests.

A Hartford woman has left \$100,000 for the Protestant Cathedral in New York, and Miss Edson of that city has bequeathed \$100,000 more and made the Cathedral her residuary legatee. However, Miss Edson's will is being contested.

LOST AT SEA.

Twenty-Eight People Perish.

AND A NUMBER OF ANIMALS.

Two New Catholic Dioceses Created in Canada.

Three Nihilists Convicted in St. Petersburg.

Wreck of the Whaler Tom Pope.

SAN FRANCISCO, Nov. 17.—Captain Sherman of the steam whaler William Lewis, which arrived yesterday from the Arctic, said to-day that the wreck of the Tom Pope, whaling tender to the New Bedford fleet, was now somewhere in the neighborhood of Point Hope, and is gradually going to pieces. The vessel was driven ashore last August, and the Lewis rescued the crew. Captain Sherman purchased the wreck on cargo. Regarding the criticism of Captain Fisher for cutting away the masts, he said if the masts had not been cut away they would have been torn away by the heavy seas. The cargo could not be saved by the Pope's crew. He did not think the suits brought here to recover the cargo would be successful.

A Civil Suit.

SAN FRANCISCO, Nov. 17.—Suit was begun in the Superior Court to-day by the Pacific Rolling Mill Company against Jacob Jensen, Michael Olsen et al., owners of the bark Sumatra, to recover \$55 and the value of the merchandise sold by the plaintiffs to the San Francisco Contracting Company, and shipped on the Sumatra to Tonala, in Mexico. Before the goods were delivered the Contracting Company became insolvent, and the owners of the vessel were notified not to deliver over the goods. The notice was not heeded, however, and the owners of the vessel are now held liable by the plaintiffs.

Nihilists Convicted.

By Cable and Associated Press.]
ST. PETERSBURG, Nov. 17.—The trial of the Nihilists implicated in a plot against the Czar is concluded. Sophie Guengburg, arrested in Paris for having bombs in her possession, together with two of her accomplices, named Stoianofsky and Freifeld, were found guilty and condemned to be hanged. The Court recommended the Czar to remit the sentence of death against Stoianofsky and Freifeld to banishment to Siberia. Two officers who were charged with complicity were acquitted.

Still Counting—A Jury Obtained.

SAN FRANCISCO, Nov. 17.—Over two hundred precincts were to be counted when the election commissioners met this morning. The count progresses very slowly. A number of errors were found to-day, but there were no important changes.

A jury was secured this morning to try Sidney Huntington and Charles Rochette for engaging in a prize fight at the California Club on September 12th.

Two Business Failures.

By Associated Press.]
MINNEAPOLIS (Minn.), Nov. 17.—The Lumbermen's and Manufacturers' Fire Insurance Company and the Mutual Fire Association were this morning placed in the hands of receivers. The business of the companies was confined mostly to Wisconsin, Minnesota and Illinois. Their assets, which are \$150,000, are largely in excess of their liabilities.

Exciting Session Predicted.

By Cable and Associated Press.]
DUBLIN, Nov. 17.—Parnell, in a letter to the Freeman's Journal, reminds his followers of the importance of being in Parliament on opening day. He says it is unquestionable that the coming session will be one of combat from first to last, and great issues depend upon its course.

Large Loss of Life.

By Cable and Associated Press.]
LONDON, Nov. 17.—Early this morning a ship having on board a party of laborers and a large number of animals for the Island of Braza caipized off the Dalmatian coast. Boats put off from the shore and rescued thirteen men. Thirty-eight persons and 100 animals perished.

Two New Dioceses.

By Cable and Associated Press.]
ROME, Nov. 17.—The Pope will create two new dioceses in Canada—one from a portion of the Bishopric of Quebec and the other from the Bishopric of Montreal.

The Stock Market.

By Cable and Associated Press.]
LONDON, Nov. 17.—Foreign securities are depressed. Consols are steady and American securities weak. The rate of discount in the open market is nominally the same as the Bank of England rate.

Dispatches just received from continental houses show they are all weak.

At 4 p. m. the market for foreign and other securities was better. American railway securities were very excited, and prices are generally unchanged.

New York, Nov. 17.—Stocks opened comparatively free from excitement and were strong and higher for many leading shares. Lackawanna, Burlington and Quincy and the sugar trust were the only stocks which showed a marked decline.

At 10:30 A. M. Randalls & Wierum, brokers, suspended business. The failure had no effect on the market, which is now steady, with the general list well held at small fractions above the opening figures.

Wierum states that the engagements of the firm are very small, and he expects an early adjustment.

The market continued irregular and feverish, though at 11 o'clock it was generally firm at something better than the opening.

At 11:20 Gregory, Ballou & Co., brokers, failed. Gregory says the cause of the suspension was the shrinkage in stocks, and he believes their embarrassment will be temporary only.

Money is from 5 to 6 per cent. and stocks are generally active and firm at the best figures of the morning, although a few unimportant stocks sold off under sales for accounts at suspended prices.

The application for a receiver for the North River Bank was postponed till to-morrow, pending negotiations for a resumption of business.

The high London quotations and the buying of stocks by London houses caused a partial return of confidence in the stock market. This was increased by an understanding that Jay Gould, D. O. Mills, the Vanderbilts and other important interests would join hands in giving support to prices. It was also stated that a large pool in which Gould was interested had been a heavy buyer of Northern Pacific.

Stocks after 11 o'clock had a very ordinary appearance, while trading was moderate and firm and prices were advanced over the entire list, but with considerable irregularity, however. Northern Pacific preferred and sugars again developed a weakness, retreating at 1 1/4 at 2:15, but fairly active near the best prices of the day.

Stocks were quiet after 2:15, and were firm without any material change. The closed fairly active at about the best prices of the day.

Money has been tight, ranging from 6 to 186 per cent. The last loan was at 96.

Boston, Nov. 17.—Kidder, Peabody & Co. are in receipt of a cablegram from Baring Bros. stating that all matters are arranged satisfactorily, and permanently authorizing Kidder, Peabody & Co. to proceed with their business as usual.

The Boston Clearing House Committee voted unanimously this morning to issue clearing house certificates at a rate of interest on the certificates of 7 3/10 per cent. Security must be put up by any bank asking for certificates in the ratio of \$100 for each \$75 advanced. No certificates will be asked for to-day, and the amount will not be limited.

A Frame Fire.

SPECIAL TO THE GAZETTE.]
FRESNO, Nov. 17.—A fire was discovered this morning in the rear of the United States Hotel building, owned by Jerry Ryan, and before the flames were extinguished the damage amounted to \$10,000, including Ryan's building, Cole's wholesale store, Martinez' saloon and others. The insurance is small.

Putting Wires Under Ground.

The work of putting the wires under ground in New York goes on steadily and with considerable progress. The electric light and power companies have many miles of cables in the subways and are obtaining very fair results.

BETTER THAN GOLD.

RESTORED HER HEALTH.

For 25 years I suffered from boils, erysipelas and other blood affections, taking during that time great quantities of different medicines with no giving me any perceptible relief. Friends induced me to try S. S. S. It improved me from the start, and after taking several bottles, restored my health as far as I could hope for at my age, which is now seventy-five years.

Mrs. S. M. Lucas, Bowling Green, Ky.

Given Away.

The article the GAZETTE is giving away is no cheap or common-place affair, it is something every family ought to have. It is a

Medical book for home use.

A book that is valuable, and choice in its language.

A book of 480 pages.

A book which you do not have to keep under lock and key.

A well printed book.

A well bound book.

50,000 copies have sold in the last six months.

It is a \$3 book which is given away.

OUR PURPOSE—We are making this new departure for two reasons:

First. We wish in this way to express to our Old Subscribers our appreciation of their patronage.

Second. We hope to induce a large number of New Subscribers to take our paper.

OUR PLAN—We shall give a copy of this three dollar book to each one of our subscribers this year, old as well as new, as follows:

A new subscriber who sends for the WEEKLY GAZETTE and STOCKMAN for one year at \$2.00 in advance, we will give a copy of this \$3.00 book.

To any old subscriber who will renew his or her subscription for one year, at \$2.00 in advance, and get us one new subscriber at \$2.00, we will give a copy of the book.

In this case, the new subscriber will also get a copy of the book with his year's subscription.

To all delinquent subscribers who will pay arrearages and renew for one year, at \$2.00 in advance, and get us one new subscriber, at \$2.00, we will give a copy of this 3.00 book.

The new su also get a book.

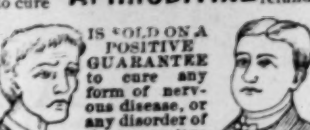

Where the book is sent by mail, 20 cents must accompany the order for postage.

"Our Family Physician."

A HANDSOMELY BOUND BOOK of 480 pages, giving symptoms of all diseases and recommending treatment according to four different schools, will save \$50 in doctor's bills in one year. Given away with THE WEEKLY GAZETTE and STOCKMAN one year.

The Celebrated French Cure,

Warranted to cure **APHRODITINE** or money refunded.

IS SOLD ON A POSITIVE GUARANTEE to cure any form of nervous disease, or any disorder of the generative organs of either sex, whether arising from AFTER the excessive use of stimulants, Tobacco or Opium, or through youthful indiscretion, over-indulgence, etc., such as Loss of Brain Power, Wakefulness, Bearing-Down Pains in the Back, Seminal Weakness, Hysteria, Nervous Prostration, Nocturnal Emissions, Leucorrhea, Discharges, Weak Memory, Loss of Power and Impotency, which if neglected often lead to premature old age and insanity. Price, \$1 a box; 6 boxes for \$5. Sent by mail on receipt of price. A WRITTEN GUARANTEE for every \$5 order, to refund the money if a Permanent cure is not effected. THE LATEST HYPNOTIC.

Powerful Properties of Hypnot, the New French Drug.

A Combination of Chloral, Hydrate and Antipyrin—Physicians Disposed to Give It a Wide Berth Until It Is Thoroughly Tested.

A newly-discovered remedy in the domain of medicine, and one that is exciting considerable comment among physicians and pharmacists is what is known as hypnot. To the French chemists belong the honor and credit of the discovery, and it will remain for them to prove the excellence of the discovery, also its practical application to the curing of disease, as a safe, sure and speedily acting remedial agent. Hypnot is as yet comparatively unknown in America, except as treated in medical literature, more especially foreign publications. In a recent issue of Les Nouveaux Remedies the following formula by Bonnet, for obtaining hypnot, is given:

Dissolve in two parts of hot distilled water six parts of antipyrin. In another vessel dissolve one part of chloral hydrate in one part of hot water. Mix the still hot solutions and filter rapidly. On cooling, an oily material will separate from the filtrate and add to it 10 drops of the supernatant water and set it aside in an open pan to crystallize.

To the oily residue add six parts of a sufficient quantity of hot water to redissolve it and stand. In the course of three or four days a crop of large crystals will be found in each of the two vessels. Remove these carefully, let drain and return the drainage to the residual mother liquor and resettle. To the liquor, raised to boiling in a water bath, add 0.7 part of chloral hydrate dissolved in one part of boiling water, with stirring from the fire and let crystallize. By following this technique, from 10 pounds of antipyrin and about 3/4 pounds of chloral hydrate, about 5 pounds of hypnot, or monochloral-antipyrin, may be obtained.

The chemicals entering into the composition of hypnot are of such a character and power as drugs to necessitate their use in exact proportion, and they must be of absolute purity to realize correct precipitation, else the result may be an entirely different remedy in action and in properties; hence the medical practitioners are warned that to get the benefits of hypnot they must prescribe the article itself as prepared in the laboratory and not a mere mixture of solutions of chloral and antipyrin. Bichloral-antipyrin is not hypnot, though often resulting from an unequal proportion and is a mistaken precipitation.

The remedy is said to have an agreeable taste, and is not objected to by children, and in this respect alone is preferable as well as superior to chloral. Its action is to produce cessation of pain and invite sleep within thirty minutes to an hour after taking, according to the severity and type of case in hand. The principal superiority of the remedy over chloral is in the absence of all disagreeable taste and irritation of the stomach that usually accompanies the use of the latter.

In a tour of investigation among the best-known practitioners a St. Louis Republic reporter was informed by the majority of those seen that as yet the newly-discovered remedy was a comparative stranger to the American public, but from the authorities and accounts in leading foreign medical publications hypnot was destined to become a valuable acquisition to materia medica. The value of the discovery to the nerve specialists and to the profession in the treatment of all nerve affections will be incalculable if the half that is claimed be true. As yet its newness prevents, and for some time will continue to prevent, a very extended use of hypnot, also its expense, its ingredients being of the most expensive of drugs, the antipyrin being a patented article and its use in a measure prohibited by the manufacturers. Then, too, the jealousy of foreigners in invention, experiment or otherwise, on the part of the American practitioners will defer any experimental investigations in this country for a time. Apropos to this last the following, from a leading St. Louis practitioner, will be of interest:

"I have read of the new remedy hypnot, but have had no experience with it as none has been imported to date. I have very little faith in the drug until it has been thoroughly tried and exact clinical reports heard from. The number of new remedies similar in character which have been brought out by foreign drug manufacturers is remarkable; hardly a week passes without physicians receiving circulars from these foreign manufacturers, claiming to be the first to have discovered a new remedy. The temptation to habitual use of the majority of the new remedies is often very strong, and many wrecks of body, mind and soul can be often laid at the doors of some of them. The drug hypnot is a derivation of chloral and antipyrin, and it is claimed that fifteen grains relieves pain and brings on mental quietude. I hope that it will merit all that is claimed for it. As to the cost of the drug it will probably be very expensive, for the drugs from which it is manufactured are quite expensive."

Doing the Graceful Thing. The chairman of a public meeting is expected to use pleasant phrases when he introduces those who take part. At Saratoga lately there were public memorial services on account of the death of a highly-esteemed citizen. The rector of the Episcopal church had been invited to offer prayer, and the chairman, feeling it incumbent on him to do the graceful thing, made this announcement: "The audience will now have the pleasure of listening to a prayer by Rev. Dr. Cary."

Smoking and Chewing. A Chicago doctor, who has been studying the question closely, is responsible for this statement: "Smoking and chewing, or either, is injurious as you have heard all your life, if indulged in too much. But there are some who can smoke and chew more than others. Now, if a man smoke or chew without expectorating I make bold to say that such a one can indulge either habit, or both, to his heart's content, and he will live as long as if he had never done either."

Suicide of Children. From January 1 to September 15, 1890, 69 children, 46 boys and 16 girls, committed suicide in Berlin. Of this number 24 had attained the age of 15, 14 their 14th year, 9 their 13th, while 7 were only 12 years of age, and 1 had not attained the age of 7. In most of the cases the immediate cause for the act remains a secret, but it is supposed to have been due to exceptional severity on the part of servants or teachers.

Doesn't Care for Sleep. David Kline, a farmer of Friedensburg, Pa., says that for three years he has not slept an average of two hours out of the twenty-four; that he does not feel sleepy, and does not suffer from the loss of sleep. When he does sleep he takes his nap in a chair.

Heroes Are All Tall. A study of novel heroes by the London Speaker discloses the fact that of 192 masculine characters in recent summer fiction almost half were described as being over six feet tall. None is too bad the average height. It is really too bad to put such finely-built gentlemen to such poor use.

KING OF RATTLES.

After Terrorizing Lee County, Ga., for Years He Meets His Doom.

The largest rattlesnake ever seen in Georgia was killed Saturday in Lee County upon the plantation of Secretary of State General Phil Cook, says the Atlanta Constitution.

The news comes through Phil Cook, Jr., a son of the General. The snake has terrorized the neighborhood for years, and its death was the occasion of a jubilee celebration amongst the darkies in that vicinity. Even the white people joined in the general feeling of relief that so dangerous and dreaded a neighbor was rid of at last.

The snake, by actual measurement, was a little over eleven feet long. It had nineteen rattles and a button. The snake has been hunted for years, and traps innumerable have been devised for his capture.

His den is in an impenetrable section of the Kinshafoon swamp. Near this is a cypress pond, and between the swamps and the pond is the road.

Hundreds of times his track has been seen across this road. People that have not seen it were loath to believe the stories told about it; but the truth finally became established and the Lee County rattlesnake became famous from the Atlantic to the Pacific.

Every year the story is reprinted, with timely variations, to go the round of the press.

The snake has swallowed young pigs, chickens, rabbits and other small animals, and was dreaded by the negroes like a ghost. It was difficult to induce them to travel the road between the pond and the swamp at night.

Saturday the snake was found across the path near the pond, by Mr. Phil Cook.

Without disturbing it Mr. Cook went off for help, returning with three or four negroes armed with hoes and clubs. Stealing up near the snake the negroes fell upon it with the hoes and clubs and finally killed it.

It was cut open, and in its belly was found a full grown buck rabbit. This probably accounts for the dormant and comparatively helpless condition of the snake and the ease with which he was dispatched.

The snake was then thrown across the shoulders of one of the negroes and carried to the house.

Though the negro was a stalwart, muscular man, he staggered under the load.

It was heavier, he declared, than a sack of guano.

General Phil Cook says it was the largest rattlesnake he ever saw or heard of.

At any rate, this is the end of the famous Lee County monster.

AN AMERICAN VENUS.

A Harvard Man Discovers the Most Beautiful Woman in the Country.

The Washington Post says it has long been known that personal will and persistent effort can do much to promote the grace and charm of female loveliness. But it remained for the scientific evolution of these later days to discover and disclose less recondite methods of securing and retaining the attributes of physical beauty. Unlike some of the secrets of the ancients these methods are in full accord with the laws of health and are founded upon the necessity of proper and natural exercise. To lead to the best results schools of physical culture have been established—notably, the school under the direction of Dr. D. A. Sargent at Harvard.

Some time since Dr. Sargent, with the view of ascertaining the results of his system, offered a prize to be awarded to the most symmetrically beautiful woman in the country. Out of 3,000 competitors it was won by Miss Margaret Blanche Best, of Meadville, Pa., who is thus officially declared, upon expert testimony, to be, so far as is known, the most beautiful woman in the United States. To show that this result is the effect of exercise and physical training, Miss Best, who is twenty-five years old, says that in her twentieth year she was quite slight in form and gave no promise of the symmetrical development which has won for her such distinction; and she insists that whatever beauty she now possesses is due to resolute practice on her part, intelligently directed.

But not only is beauty to be attained through persevering exercise under healthful conditions; it is also to be retained by will and persistent effort. There is no more potent foe to its retention than the tendency to embonpoint with which so many of our beautiful women have to contend, and which threatens in their prime to rob them of all physical grace and charm. But this tendency may be controlled through the adoption of a strict dietary regimen and a course of sustained and healthful exercise.

It would seem that fresh air and well-directed exercise hold the real secret of physical beauty. In their use all that is requisite is a resolute disposition, and thus it is found to be measurably true that almost every one may become beautiful at will.

Suicide of Children. From January 1 to September 15, 1890, 69 children, 46 boys and 16 girls, committed suicide in Berlin. Of this number 24 had attained the age of 15, 14 their 14th year, 9 their 13th, while 7 were only 12 years of age, and 1 had not attained the age of 7. In most of the cases the immediate cause for the act remains a secret, but it is supposed to have been due to exceptional severity on the part of servants or teachers.

Doesn't Care for Sleep. David Kline, a farmer of Friedensburg, Pa., says that for three years he has not slept an average of two hours out of the twenty-four; that he does not feel sleepy, and does not suffer from the loss of sleep. When he does sleep he takes his nap in a chair.

Heroes Are All Tall. A study of novel heroes by the London Speaker discloses the fact that of 192 masculine characters in recent summer fiction almost half were described as being over six feet tall. None is too bad the average height. It is really too bad to put such finely-built gentlemen to such poor use.

The equivalent, in English money, of \$2.00 was once offered by an old lady in London for the return of a favorite cat which had strayed or been stolen. People called her a "crank" and perhaps was it is unfortunate that one of the gentler sex should ever gain this title, yet many do. It is, however, frequently not their fault. Often functional derangements will apparently change a woman's entire nature. Don't blame such sufferers if they are "cranky," but tell them to use Dr. Pierce's Favorite Prescription, which is an infallible remedy for "female weakness." "Favorite Prescription" has cured thousands of poor, bed-ridden suffering women of "female weakness," painful irregularities, ulcerations, organic displacements and kindred ailments too numerous to mention. It is the only medicine for women, sold by druggists, under a positive guarantee that it will, in every case, give satisfaction or the price (\$2.00) will be refunded.
